

BMT CTN 0402

Research Sample Types and Collection Schedule

Subject	Sample Type	Sample Aliquot Volume & Quantity	Prior to Stem Cell Donation	Pre-Conditioning Baseline	Post-Transplant				
					Day 28	Day 100	Day 180	Day 365	Day 730
Patient	Serum	0.2-1.0 mL ~ 10 aliquots		X	X	X	X	X	X
	Plasma (EDTA)	0.2-1.0 mL ~ 10 aliquots		X	X	X	X	X	X
Donor	Plasma (EDTA)	0.2-1.0 mL ~ 10 aliquots	X						
	WBC Cell Pellets	~ 6 aliquots	X						
	Serum**	0.2-1.0 mL ~ 10 aliquots	Note 2						

Note 1: Sample aliquot processing was performed by the clinical sites. See Appendix C of protocol for a description of peripheral blood processing procedures. Frozen sample aliquots were periodically batch-shipped to the NHLBI Repository. All samples being stored at -80°C.

**** Note 2:** A content error in version 1 of the protocol resulted in the collection & processing of donor plasma and serum aliquots instead of donor plasma and WBC cell pellets as originally intended. Donor serum aliquots, collected from donors associated with patients enrolled in the first part of the 0402 study, are displayed as part of this collection and are available for ancillary studies.
